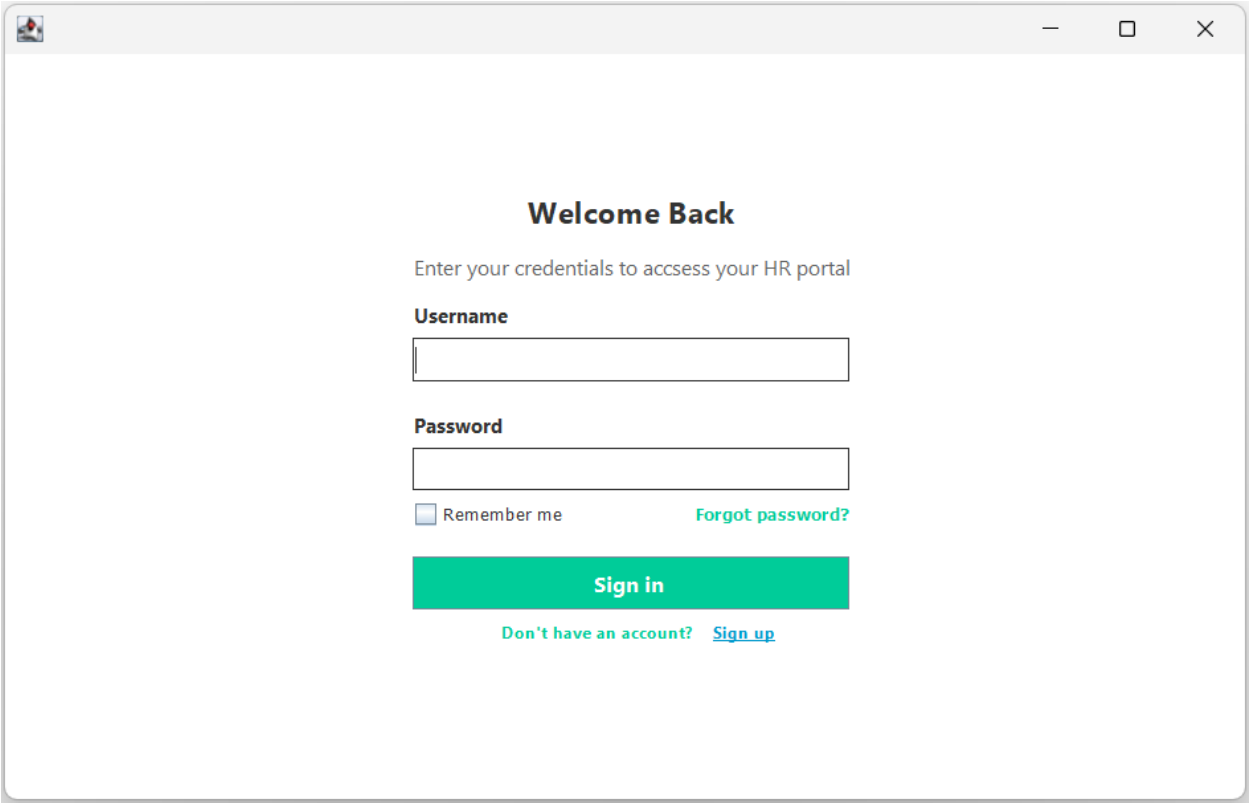
CPIT305 Project Phase 2

Name	Tarafh Alakor	Ghaida Alhadi	Mawadda Alsubhi	Amal Aljohani

1. Sign In Frame:

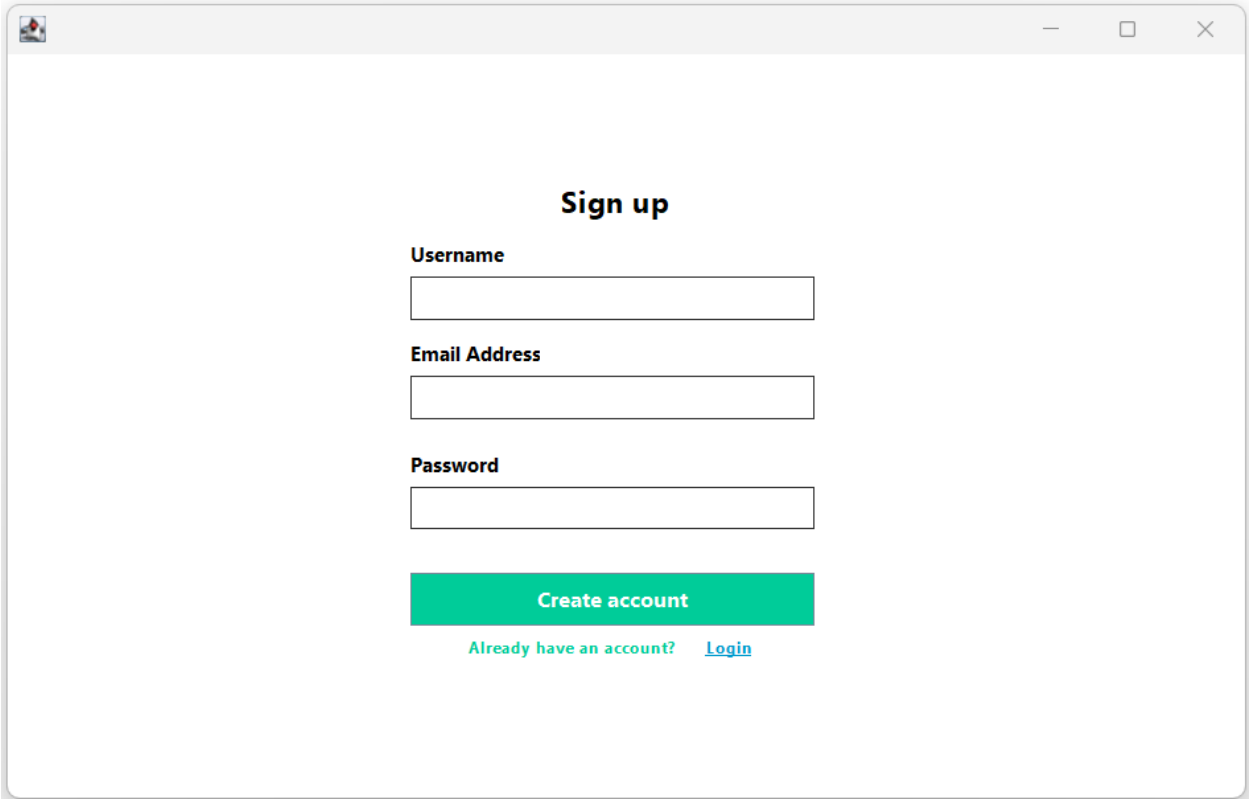


Purpose: This frame allows users to log into the system using their credentials.

Components: The frame includes fields for entering a username and password, along with a "Sign In" button to initiate the login process. There is also a "Forgot Password?" link for users who need to reset their password. Additionally, a link is provided that takes the user to the **Sign-Up** page if they don't have an account yet.

User Interaction: The user enters their credentials and clicks the "Sign In" button. If the credentials are valid, they are granted access to the system. If not, an error message may be displayed. If user does not have an account, they can click the link to navigate to the **Sign-Up** page.

2. Sign Up Frame:

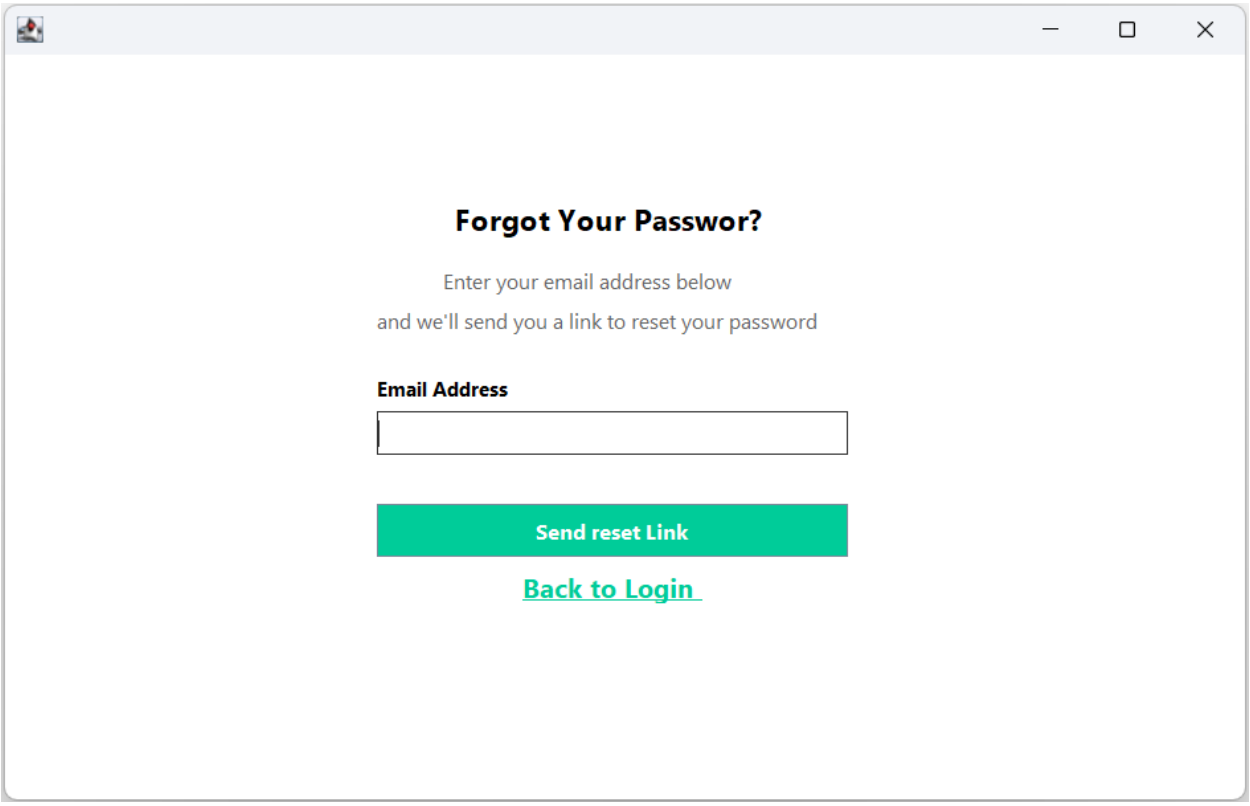


Purpose: This frame allows new users to create an account in the system.

Components: The frame contains fields for entering a username, email, and password. There is a "Sign Up" button to submit the information, as well as a "Login" link for users who already have an account.

User Interaction: The user fills in their personal details and password and clicks "Create account". Successful account creation takes the user to the next relevant screen.

3. Forget Password Frame:

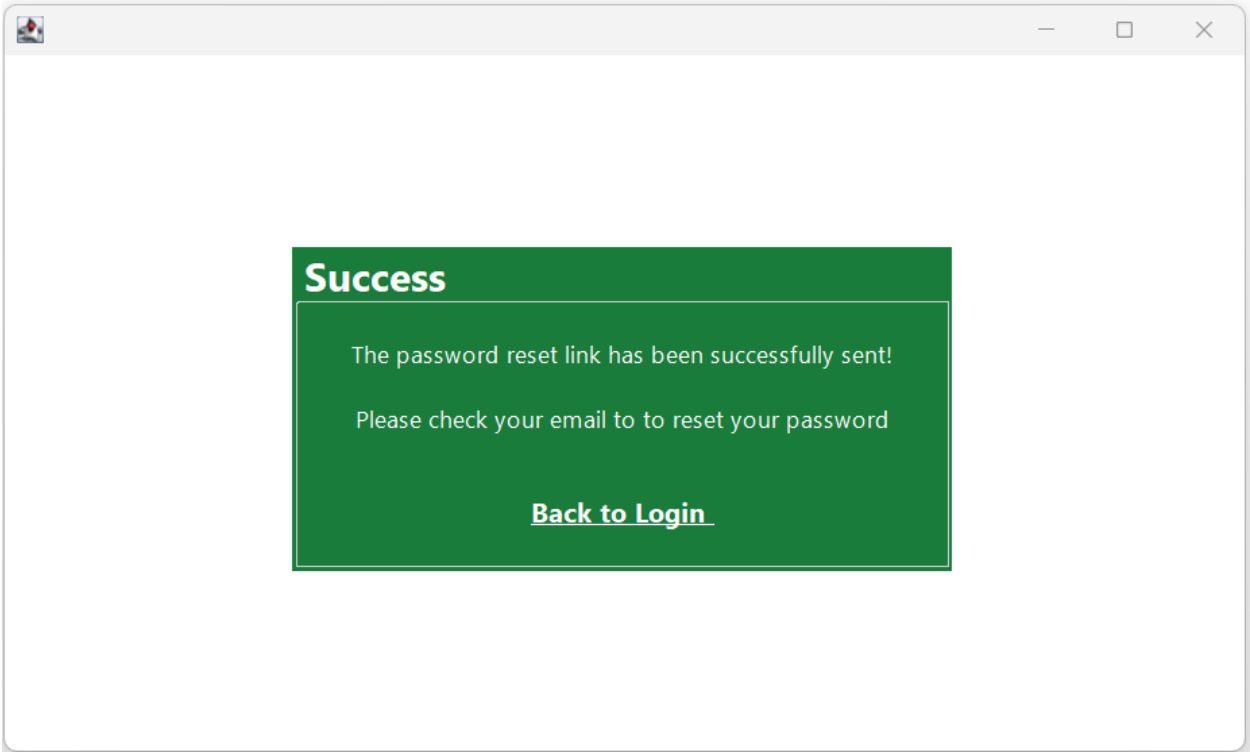


Purpose: This frame helps users recover their password by requesting an email address.

Components: A text field for entering the email address associated with the account and a "Send reset Link" button.

User Interaction: The user enters their email address and clicks " Send reset Link" If the email is valid, they will receive a link to reset their password.

4. Password Reset Successfully Frame:

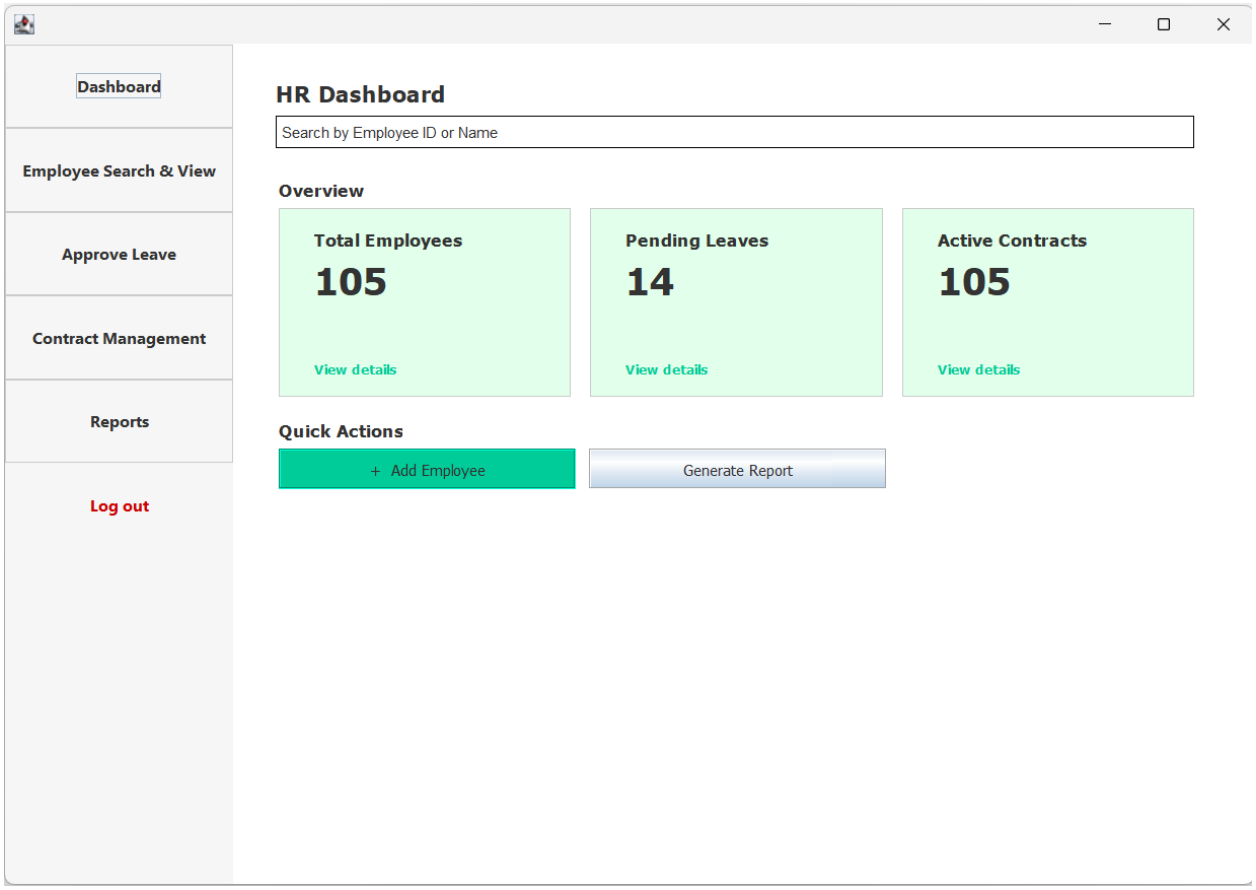


Purpose: This frame confirms that the user has successfully reset their password.

Components: A confirmation message and a "Login" button to redirect the user to the sign-in page.

User Interaction: The user clicks "Login" to return to the Sign In frame after resetting their password.

5. Dashboard Frame:

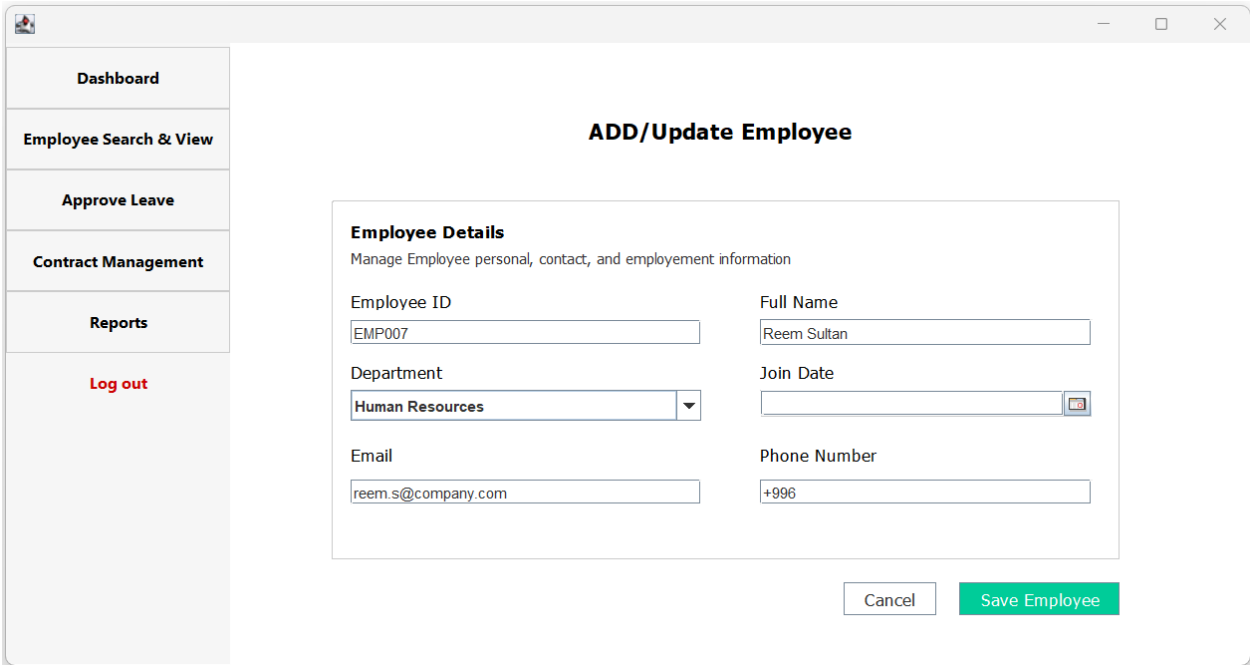


Purpose: The main user interface provides quick access to various system functions.

Components: A navigation bar with options like "Employee Search & View", "Reports", "Contract Management", and more. Each button redirects to the relevant frame.

User Interaction: The user can navigate to other frames by clicking on different buttons or options. This frame acts as the hub of the application.

6. Add Employee Frame:

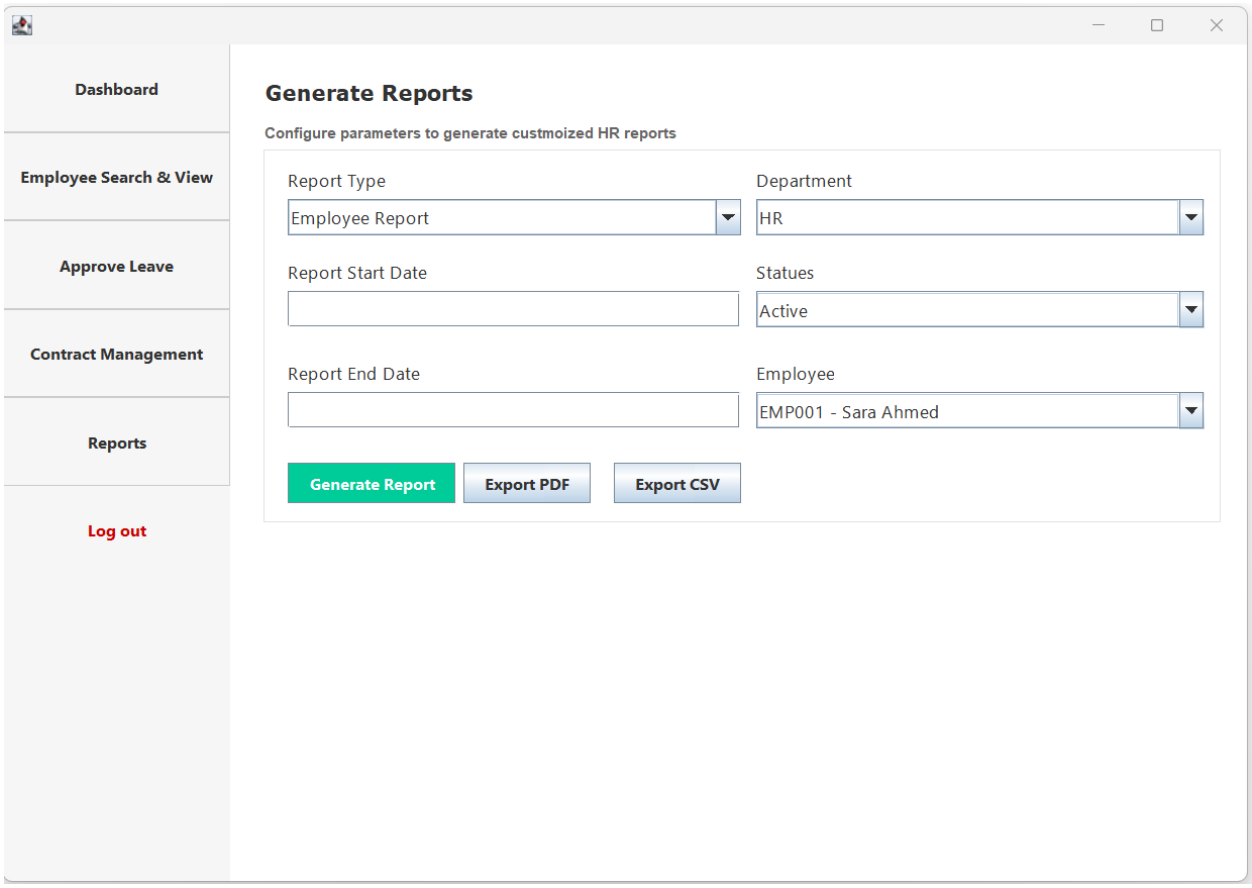


Purpose: This frame allows administrators to add new employees to the system.

Components: Fields for entering employee details such as name, department, and contact information, along with an "Add" button.

User Interaction: The user fills out the employee's information and clicks "Add" to submit the new employee data.

7. Generate Reports Frame:

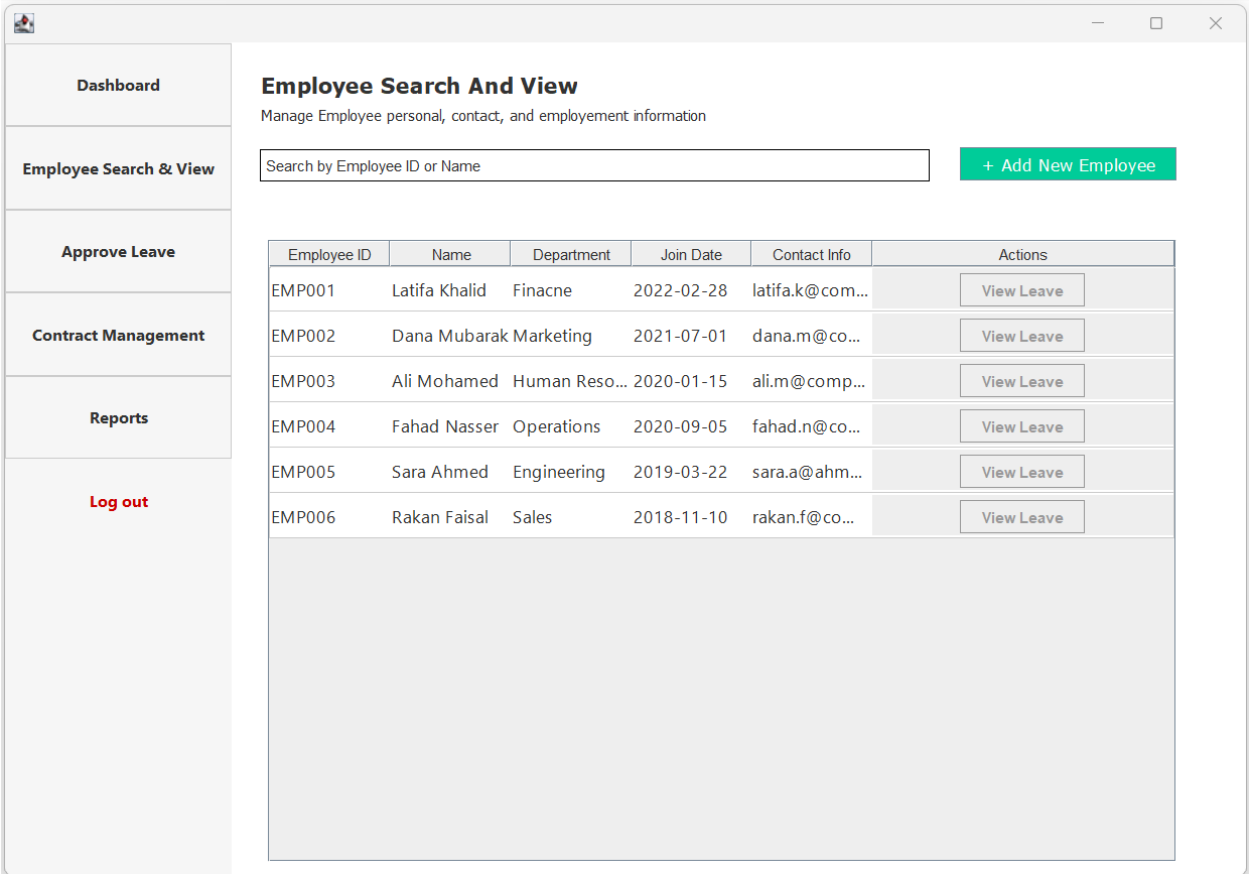


Purpose: This frame enables users to generate and view various reports based on system data.

Components: Options to select report type, date range, and other filters, along with a "Generate" button.

User Interaction: The user selects the desired parameters for the report and clicks "Generate" to view or download the report.

8. Employee Search & View Frame:

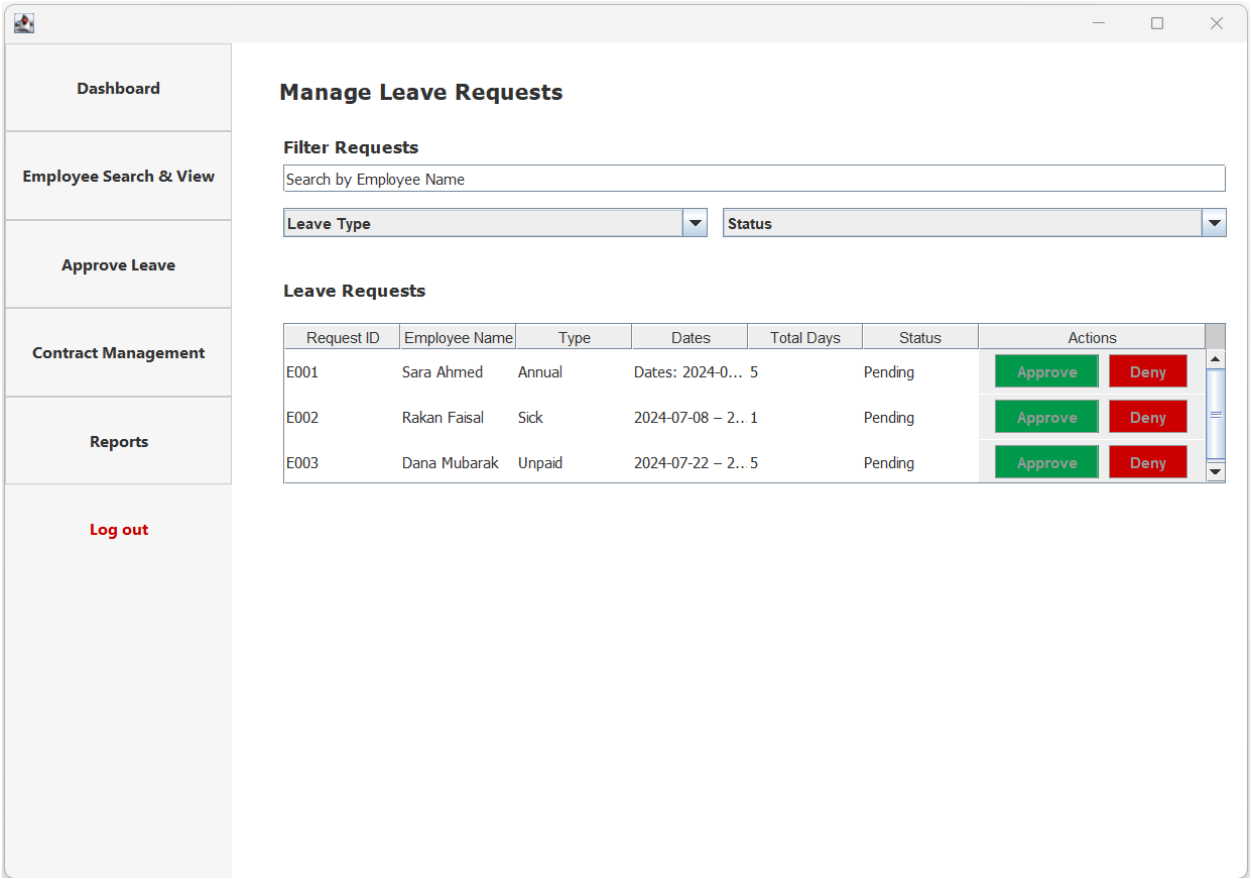


Purpose: This frame allows users to search for and view employee details.

Components: A search field for entering employee names or IDs, along with a "Search" button. The frame displays search results with options to view detailed employee information.

User Interaction: The user enters a search term and clicks "Search." Results are displayed, and the user can click on an employee's entry to view more details.

9. Manage Leave Request Frame:

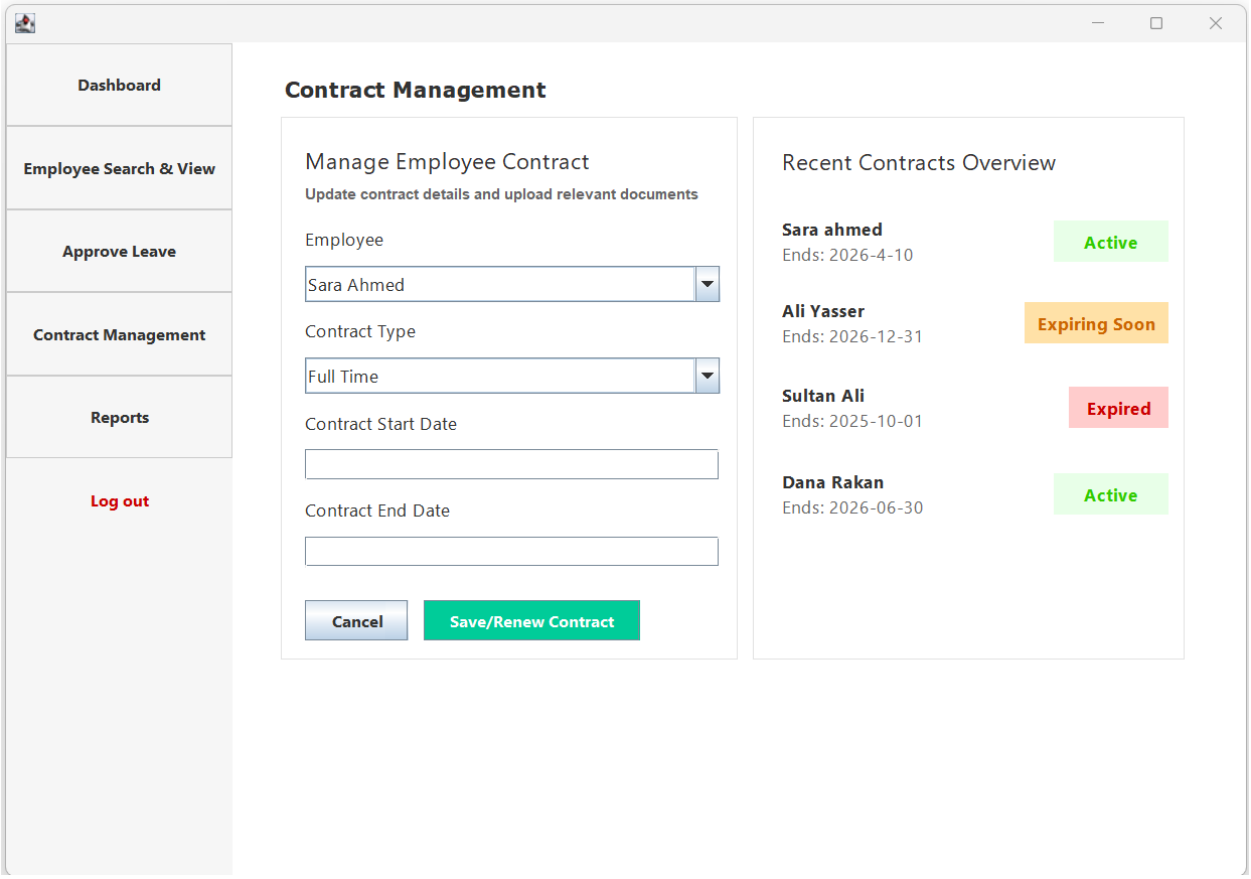


Purpose: This frame allows users (usually managers or HR staff) to manage employee leave requests.

Components: A list of leave requests, buttons for approving or rejecting requests.

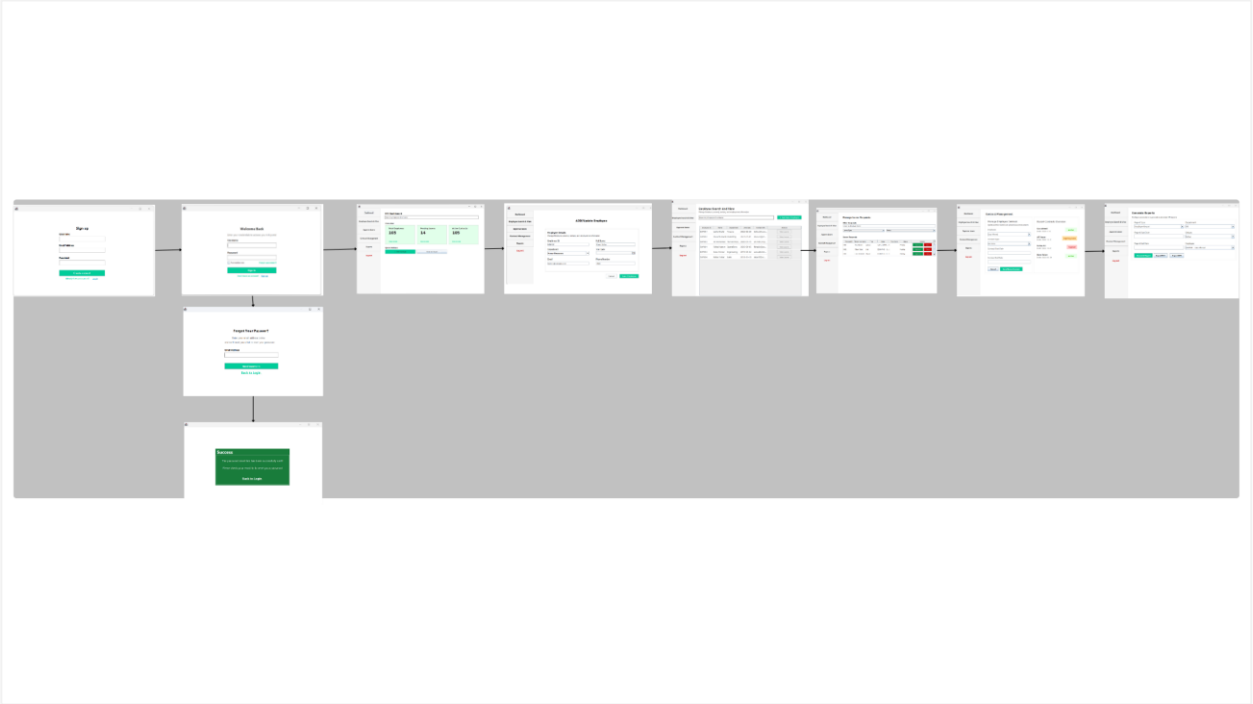
User Interaction: The user can approve or reject leave requests by clicking the respective buttons.

10. Contract Management Frame:



Purpose: This frame handles employee contracts, including viewing, editing, or creating new contracts.

Components: Fields to input contract details, such as employee name, contract duration, terms, and other relevant information. There are buttons for adding, editing, or deleting contracts.

User Interaction: The user fills out or modifies contract details and clicks the respective buttons for submitting changes or adding new contracts.


General model of the system Interaction:
